

Pacific Urethanes is committed to environmental protection and sustainability.

Pacific Urethanes is committed to ensuring its operations are performing at the highest level of environmental protection and sustainability. The company recently was awarded the Environmental Management System Certification Number 615714 as confirmation that it is operating in accordance with the requirements of ISO 14001:2004.

Environmental Policy Statement

Pacific Urethanes commits to ensuring that its products and its business activities comply with all relevant legal and any other requirement with respect to environmental preservation and prevention of pollution within Australia.

Pacific Urethanes commits to continuously improve its products and business activities in order to prevent or minimise pollution and work towards a more sustainable use of natural resources as far as business conditions allow.

Pacific Urethanes is cognisant that the highest impact on the environment occurs during the downstream lifecycle of our products. Where feasible we will commit to educating and influencing all stakeholders to minimize these environmental impacts.

UrePac™ Rigid 6 9 in Hickory SYNC

SYNC Building Systems is a leading edge manufacturer based in Melbourne Victoria that are able to take the construction of customised bathroom assemblies, or “pods”, off the building site and into a fully controlled assembly line. The pods are then lifted into place on the construction site and connected in a fraction of the time and cost that it would take to do by traditional methods.

The pods are fully engineered and quality controlled by SYNC’s team of experts giving the builders peace of mind in what is historically one of the most difficult to manage areas of a construction project. SYNC teamed up with Pacific Urethanes to use our spray in place, open cell insulation product UrePac™ Rigid 6 9, predominantly for its outstanding acoustic absorption properties rather than its usual thermal insulation properties.

The management of Hickory saw the value in dealing directly with the technical team that has developed this technology so that it can be tailored specifically for their application, rather than a dealing with a trader who supply a third parties technology.

Colin Groom our BDM completed the “Ride to Conquer Cancer”

Colin Groom our Business Development Manager recently completed the “Ride to Conquer Cancer” benefitting the Peter MacCallum Centre.

The 1st day he cycled from Albert Park to Mornington via Hastings a distance of 105 kilometres with a riding time was 6 hours and 5 minutes.

On the second day he broke his personal speed record with the dial hitting 54 kph on the downhill into Safety Beach. The distance for day two was 102 kilometres.

He was urged on by the support of cancer sufferers, survivors and victims’ families along the side of the road. The ride concluded by crossing the finish line on the “Grand Prix track at Albert Park.

We are all very proud of Colin’s efforts in completing the ride and raising over \$3400 for the Peter Mac. Colin was very proud to have taken part and grateful for the generous donations, support and encouragement he received from many customers and suppliers of Pacific Urethanes.
